

THE WORLD OF PREMIUM STYLING FROM ONE HAND

Opticparts DF

Scooter Styling

Welcome to Opticparts DF – your specialist for visual scooter tuning!

Opticparts DF, also known as ODF represents high-quality scooter styling parts made in Germany.

Since more than 10 years our company has been developing a large assortment of stylingparts in close contact to the scooter scene as well as in cooperation with our trade partners.

Due to this determined product development we have been able to set new trends in the accessory range and with it the name Opticparts DF has been grown up to an international brand which is a synonym now for products with excellent quality and uncompromising designs.

Our assortment of manufactured articles includes actually over 300 different products.

Beside our own production-line we import at about 200 further styling parts which make it possible for us to supply each and any item from one hand to create a perfect styled scooter.

Our dealer clients are given optimum support in order to give our products best possible placement on the market:

- Gratis catalogues which can be passed on to your dealer clients.
- Professional product photos will be provided to you on DVD for any use.
- Detailed descriptions of all articles can be copied from our homepage, thus enabling you to list our articles in your online shop or catalogue very quickly.
- Constantly updated homepage including PDF online catalogue for download which is always up to date.
- Permanent newsletter service by e-Mail in case of novelties including an updated price list with your individual conditions.
- Guarantee of short delivery times caused on high stock rates.

Thank you in advance for your interest in our assortment.
Our export department is looking forward to receive your inquiry and to create an individual offer according to your proposals.

JOIN YOUR SCOOTER WITH OPTICPARTS!

FOOTPLATES: CHECKERED ALUMINIUM

Foot plates Flash catcher upgrading each and any scooter!

By the help of sophisticated special tools our extra solid 4 mm plates will be adjusted exactly to the shapes of the under floors.

The cutting-to-size will be made in a proper way exactly fitting to size by CNC Laser technology. The quintuplicate ribbing will additionally guarantee optimum grip.

During production particularly high-quality aluminium will be used featuring an extremely high degree of brightness.

Sheets thus appear almost chromium plated. Assembly is made extremely easily by the original drilling holes already available at the scooter. Delivery will include special steel screws.

FOOTPLATES: „STYLE 16“

From now on individual styling is unlimited by the new ODF "Style16" foot plate edition.

„Stlye16“ is:

- foot plates in 4 different colours – black, white, red
- center cut with tribal design
- The article is available in sets.
- You can chose from the following combinations:

- Red-Black
- White-Red
- Black-White

From now on you determine exactly the style which fits perfectly to your scooter!

By the cutting in the Tribal design two colour halves rise in the middle into each other which provides a very brilliant and harmonious colour mix.

The foot plates are coated with an extremely resistant and strong shining laquer which ensures a long-lasting eye catcher.

As usual, all "Style 16" foot plates by the Market leader ODF are produced out of a very strong aluminium by laser cut technology and show a perfect fitting accuracy.

FOOTPLATES: „TC LINE“

Footplates by ODF from the new TC Line (Top Custom Line) which stands for custom parts of highest possible quality in connection with uncompromising designs.

The TC Line footplates are made of brushed high-grade steel and are cut by CNC laser technology. As living from Opticparts, all necessary models are bent by special tools precisely which guarantees an optimum accuracy of fit.

The sporty air shaft design, as well as the noble ODF and TC-Line brandings make these high-quality footplates a superlative custom part.

As a special highlight, suitable ultra grip elements can be simply inserted and screwed inside the air shafts. The black varnished grip elements protrude 3mm beyond the footplates with the result of a very brilliant 3D effect.

On the other hand a rather better grip on the footplates will be obtained even when it is raining and the designs between the grip elements will be protected much better against scratches.

The delivery of the grip elements follows in a set with 4 parts for both footplate sides.

SIDEWARDS NUMBERPLATE-HOLDER:

These numberplate-holders are among the greatest trends in the scooter tuning scene which are laterally fitted to the side of the motor.

By mounting the numberplate in this way it is then possible to remove the rear mudguard, in order to achieve a more beautiful view on the scooters back end, and by help of a vertical shifting set.

The holders are produced from high-quality silver anodized aluminium building a 4mm frame on the outside of the number plate by which a particularly beautiful framing effect will be visible.

Delivery will include special steel screws.

Fitting for the following engines:	Art.-No.:
CPI-Engines	15507
Minarelli-Engines	15502
Morini-Engines	15504
Horizontal Peugeot-Engines	15509
Vertikal Peugeot-Engines	15503
Piaggio-Engines	15501

Art.-No.: 15501

Art.-No.: 15509

REAR NUMBERPLATE-HOLDER:

Special version of our numberplate-holders for universal mounting at the leading undertray.

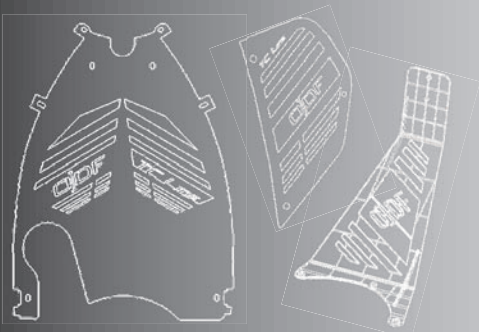

As a special gag direction indicators may be mounted directly at lateral M8 boring holes!

Delivery will be made including different mounting materials in order to be able to simply screw the holder at the plastic tail.

Rear number plate holder:	Art.-No.:
Universal - for all models	15505

Art.-No.: 15505

TC-Line Numberplate-Holders - adjustable:

Numberplate-Holders by ODF from the TC-Line (Top Custom Line) which is a synonym for stylingparts of highest quality and uncompromising design.

Beyond the quality aspects this new generation of Numberplate-Holders is also very functionally, so this article comes to perfection:

- Adjustable frame from 45° to 90°.
- Improved position closer to the engine cover.
- Processing in stainless steel with higher breaking strength instead of aluminium.
- High grade varnish with strong shining colours.
(Black, White, Red)
- Superior quality/gloss-properties of the chrome-version because of the previous polishing.

Finally these Numberplate-Holders have a good price-performance and because of all this facts they shouldn't be missing on any scooter.

Advice: Please use Loctite screwlock for mounting.

CENTRAL REAR WHEEL LICENCE PLATE HOLDERS:

As a result of numerous enquiries by end users for licence plate holders enabling to place the licence plate centrally in front of the rear wheel - as known in a series produced from the new Piaggio scooters a new variant was designed rapidly by us in an ingenious company's design.

This is suitable for any motor types.

The holders made from brushed special steel are simply fastened at the original screw holes of the Variomatik cover.

Special steel screws of longer size for mounting purposes will certainly be added to the supply.

Fitting for the following engines:	Art.-No.:
Aprilia-Engines	15508-HR
CPI-Engines	15507-HR

PREMIUM SCOOTER STYLING PARTS

— CATALOGUE 2011 —

Undertray-Covers:

From now own the popular mirror polished undertray casing for many models is available in black, white powder coated or checkered aluminium.

The effect of the new design is completed thanks to the very stylish dragon seeming aggressive which – thanks to an additional background illumination – will become an even more attractive eye-catcher.

In particular from the technical point of view the coverings mean a perfect further development compared to the versions that have been available so far - wedged between the mud guards - shake noisily while driving.

A great deal of effort was taken to achieve the goal of developing this latest generation of rear opening covers to be fastened tightly to screw holes already available after the splash protection had been dismantled completely by the client.

Delivery will be made including detailed mounting instructions by help of which even people not used to craftwork will be able to carry out mounting with a small amount of practical skills.

Custom Frame-Tubes:

Winners look like this! Opticparts Custom Frame Tubes.

This product suggestion placed 1st from our lottery game in which customers had the chance to submit to us their suggestions for new products, Opticparts immediately turned out a sales hit - hard to foresee!

Giving almost any scooter the look of a race machine with a reinforced frame, in minutes and without having to strip the bodywork.

Each set has two high-quality anodized aluminium telescopic tubes, adjustable in length from 38-72 cms as well as a patent worthy variable assembly system on the tubes to prevent the tubes vibrating against one another when in use, this is also available as a compressed special production from one tube for Yamaha Aerox and Peugeot Speedfight.

Delivery will include special steel - assembly set and instructions.

LED-Panels:

Latest generations of LED-Panels, which have been developed particularly for use outside and are therefore 100% waterproof.

Apart from the advantages known of an LED luminous unit based on the extremely small construction and strong luminous power - in case of this new variant the LEDs have been ground to a certain extent additionally on the surface.

This is because it will bring about a very broad scattering of light normally known only from Neon light.

The LED-Panels, therefore, are well suitable as illumination of undertrays or background illumination of vent coverings.

Deliverable in two different versions in 5 different colours.

Version 1 with 4 LEDs as well as version 2 with 10 LEDs!
