## BRAKE PADS OMologate

Malossi è orgogliosa di proporre alla propria clientela una gamma di pastiglie freno completa e adatta a tutti gli utilizzi, da quello stradale a quello racing. I nostri prodotti sono frutto di un'attenta fase di ricerca e sviluppo che culmina nel superamento degli standard richiesti per le omologazioni da un ente prestigioso come DEKRA.

### SPORT

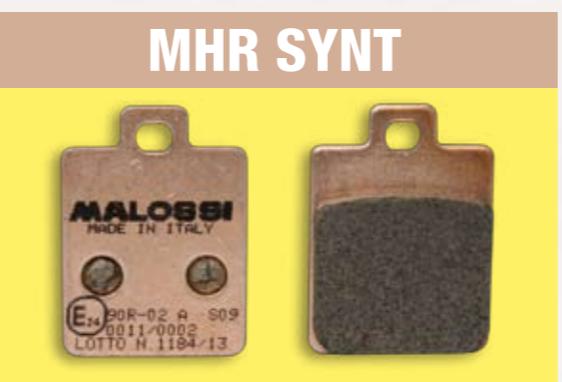

#### BRAKE PADS SPORT

Le Malossi Brake Pads SPORT sono pastiglie freno realizzate con materiale di attrito a base organica, completamente privo di amianto. Questa linea di prodotti rappresenta l'eccellenza per la sostituzione delle pastiglie di primo equipaggiamento.

La mescola di queste pastiglie garantisce una buona durata, senza penalizzare l'efficienza frenante.

Con BRAKE PADS SPORT alle prestazioni eccellenti si affianca un'elevata modulabilità della frenata, che consente di arrestare il proprio veicolo con grande sicurezza e controllo in ogni condizione.

### MHR SYNT

#### BRAKE PADS MHR SYNT

Le pastiglie con materiale di attrito sinterizzato hanno il coefficiente di attrito più elevato in assoluto e per questo garantiscono spazi di arresto più ridotti con decelerazioni mozzafiato. La loro peculiarità è la capacità di mantenere una costanza di rendimento indipendentemente dalla temperatura e dalle condizioni meteo.

Il materiale di attrito è ottenuto attraverso la sinterizzazione di polveri metalliche ed altri elementi a base di rame, da cui risulta un composto che esalta la potenza frenante senza penalizzare la durata.

### MHR

#### BRAKE PADS MHR

Il materiale di attrito delle pastiglie BRAKE PADS MHR è realizzato con fibre a base completamente organica e assolutamente prive di amianto. La mescola è stata studiata appositamente per l'uso agonistico e riduce al minimo l'effetto fading.

Le BRAKE PADS MHR raggiungono il punto di massima prestazione nel minor tempo possibile, mantenendo allo stesso tempo una perfetta costanza di rendimento e una esemplare modulabilità di frenata dal primo all'ultimo giro di una gara, condizione essenziale per l'uso in pista.

La mescola di queste pastiglie contiene elementi che impediscono al materiale di attrito di bruciare quando è sottoposto a forti sollecitazioni, come per esempio quelle che si vengono a creare durante una competizione!

R90 Approved

#### OMologazione

Malossi si impegna ogni giorno per migliorare la qualità, le prestazioni e la sicurezza dei propri prodotti e in quest'ottica si colloca la proposta di una gamma di pastiglie freno OMologate.

E' molto importante per noi che la nostra clientela sia certa che le MALOSSI PADS e MALOSSI SYNT PADS siano in linea con i rigidi standard imposti dall'omologazione ECE R90 e possano essere utilizzate sui veicoli da strada in tutta Europa e in molti paesi del mondo.

#### COME SI OMologano LE PASTIGLIE MALOSSI?

Per conseguire questa certificazione le MALOSSI PADS devono superare alcuni test su strada eseguiti sul veicolo a cui sono destinate le pastiglie. Durante questi test l'efficienza è verificata attraverso una serie di frenate sia "a freddo" che sotto stress, per valutare la resistenza della pastiglia e la sua capacità frenante a diverse velocità. Sono previste anche prove di sensibilità per valutare che

variazione di pressione serve esercitare per ottenere lo stesso valore di decelerazione a tre velocità differenti. Oltre ai test su strada, il materiale con cui sono realizzate le pastiglie viene sottoposto anche a prove di laboratorio come la resistenza alla compressione e al taglio.

Malossi ha ottenuto la certificazione E/ECE/324-E/ECE/TRANS/505 Regulation No. 90 avvalendosi della collaborazione di Dekra, un autenico colosso nel settore delle certificazioni. I test sui veicoli sono stati eseguiti dagli ispettori Dekra presso il complesso delle piste prova di Balocco (Balocco Proving Ground) e nel Centro Prove Dekra di Cinisello Balsamo, e hanno superato quanto previsto dalla normativa ECE R90 con ampi margini!

# BRAKE PADS HOMOLOGATED

Malossi is proud to present to his customers a complete range of brake pads suitable for any use, from the road to the race track. Our products are the result of an intense research and development work which lead to meet the high standards required for homologation by a prestigious organization such as DEKRA.

## SPORT

### BRAKE PADS SPORT

Malossi SPORT Brake Pads are made of organic-based friction material, totally asbestos-free. This product range represents the excellent choice for replacing OEM pads. The blend of these pads guarantees their long life, without penalizing braking efficiency. Besides excellent performance, BRAKE PADS SPORT provide a fine brake modulation, thus allowing to stop the own vehicle with great safety and control in any condition.

## MHR SYNT

### BRAKE PADS MHR SYNT

Pads with sintered friction material have the highest friction coefficient and for this reason they guarantee shorter stopping distances with breathtaking decelerations. Their peculiarity consists in being able to keep a stable performance regardless of temperature and weather conditions. The friction material is obtained through a sintering process of metal dusts and other copper-based elements. The result is a compound able to enhance the braking power without reducing the lifetime of the pads.

## MHR

### BRAKE PADS MHR

The friction material of BRAKE PADS MHR is produced with completely organic-based and asbestos-free fibers. The blend has been specifically formulated for racing use and reduces at most brake fade. BRAKE PADS MHR achieve the best performance in the shortest time, thus keeping a perfect stable performance as well as an exemplary brake modulation from the first to the last lap of the race. This is an essential condition for the use on the race track. The blend of these pads contains elements which prevent the friction material from burning when subjected to stress, such as during a competition!

### HOMOLOGATION

Every day Malossi undertakes to improve the quality, performance and safety of its products; the new range of HOMOLOGATED brake pads was designed to this purpose. It is important for us to guarantee our customers that MALOSSI PADS and MALOSSI SYNT PADS comply with the strict standards required by ECE R90 homologation and that they can be used on road vehicles in all of Europe and many countries in the world.

### HOW DO MALOSSI PADS GET HOMOLOGATED?

In order to obtain this certification MALOSSI PADS must overcome some road tests on the vehicle for which they are intended. These tests aim at checking their efficiency through a series of brakings, both sudden and under stress, in order to evaluate pad resistance and its braking capacity at different speeds. Brake pads must be tested also for speed sensitivity with the aim of evaluating which pressure variation is necessary to exert, in order to obtain the same value of deceleration at three different speeds. Besides road tests, the material of which pads are made undergoes laboratory tests such as compression and cut resistance. Malossi obtained the certification based on E/ECE/324-E/ECE/TRANS/505 Regulation No. 90 in co-operation with Dekra, an eminence in the field of certification services. The tests on the vehicles have been performed by Dekra inspectors at Balocco Proving Ground and Dekra Test Center in Cinisello Balsamo, and they passed the ECE R90 requirements by wide margin!

# BRAKE PADS HOMOLOGUE

Malossi est orgueilleuse de proposer à sa clientèle une gamme de plaquettes de frein complète et adaptée à tous les usages, de la route à la compétition. Nos produits sont le fruit d'une phase de recherche et développement attentive et dépassent de loin les critères requis pour les certifications délivrées par un organisme prestigieux tel que DEKRA.

## SPORT

### BRAKE PADS SPORT

Les Brake Pads SPORT Malossi sont des plaquettes de frein réalisées avec un matériau de friction à base organique, entièrement exempt d'amiante. Cette ligne de produits représente l'excellence pour le remplacement des plaquettes de premier équipement. Le mélange de ces plaquettes garantit une bonne durée de vie, sans pénaliser l'efficacité du freinage. Les BRAKE PADS SPORT associent aux performances excellentes une modulabilité élevée du freinage ce qui permet d'arrêter le véhicule avec un niveau de sécurité élevé et sans perte de contrôle quelles que soient les circonstances.

## MHR SYNT

### BRAKE PADS MHR SYNT

Les plaquettes en matériau de friction fritté ont le coefficient de friction le plus élevé et, pour cette raison, elles garantissent des distances d'arrêt plus courtes avec des freinages incroyables. Leur particularité est la capacité à maintenir un rendement constant quelle que soit la température et quelles que soient les conditions météorologiques. Le matériau de friction est obtenu grâce au frittage de poussières métalliques et d'autres éléments à base de cuivre, d'où un composé qui optimise la puissance de freinage sans pénaliser la durée.

## MHR

### BRAKE PADS MHR

Le matériau de friction des plaquettes BRAKE PADS MHR est réalisé avec des fibres complètement organiques et entièrement exemptes d'amiante. Le mélange a été étudié spécifiquement pour l'usage en sport de compétition et pour réduire au minimum l'effet d'évanouissement. Les plaquettes BRAKE PADS MHR fournissent leurs meilleures performances dans les temps les plus courts, tout en maintenant un rendement toujours constant et une modulabilité de freinage du premier au dernier tour de la course, condition essentielle pour l'usage sur piste. Le mélange de ces plaquettes contient des éléments qui empêchent au matériau de friction de brûler quand il est soumis à de fortes sollicitations comme, par exemple, celles qui se créent pendant une compétition !

### CERTIFICATION

Malossi s'engage, chaque jour, à améliorer la qualité, les performances et la sécurité de ses produits et, sa gamme de plaque de frein CERTIFIEES se situe donc dans cette optique. Pour nous, il est primordial que notre clientèle soit sûre que les plaquettes MALOSSI PADS et MALOSSI SYNT PADS sont conformes aux standards les plus stricts imposés par la certification ECE R90 et qu'elles peuvent être utilisées sur les véhicules routiers dans toute l'Europe et dans de nombreux pays du monde.

### COMMENT LES PLAQUETTES DE FREIN MALOSSI SONT-ELLES CERTIFIEES ?

Pour obtenir cette certification, les plaquettes MALOSSI PADS doivent passer avec succès des essais sur route effectués sur le véhicule auquel les plaquettes sont destinées. Au cours de ces essais, on vérifie leur efficacité par le biais d'une série de freinages « à froid » et sous contraintes afin d'évaluer la résistance de la plaque et sa capacité de freinage à différentes vitesses. Des essais de sensibilité sont également prévus pour évaluer quelle variation de pression doit être exercée pour obtenir la même valeur de décélération avec trois vitesses différentes. En plus des essais sur route, le matériau composant les plaquettes est soumis, lui aussi, à des tests en laboratoire comme celui de la résistance à la compression et au cisaillement. Malossi a obtenu la certification E/ECE/324-E/ECE/TRANS/505 Réglementation No. 90 avec la collaboration de Dekra, un véritable géant dans le secteur des certifications. Les essais ont été effectués par les inspecteurs Dekra sur les pistes d'essai de Balocco (Balocco Proving Ground) et au Centre d'essais Dekra de Cinisello Balsamo, et ont dépassé les dispositions prévues par la réglementation ECE R90 avec une grande marge!

# BRAKE PADS HOMOLOGIERT

Malossi ist sehr stolz darauf, ihren Kunden eine vollständige Produktpalette von Bremsbelägen zu bieten, die zu jedem Gebrauch geeignet ist, vom Gebrauch auf der Straße bis zum Racing. Unsere Produkte entspringen aus der sorgfältigen Recherchen- und Entwicklungsphase, die in der Überschreitung der Zulassungsstandards gipfelt, die von einem renommierten Verein wie DEKRA gefordert werden.

## SPORT

### BRAKE PADS SPORT

Die Malossi Brake Pads SPORT sind Bremsbeläge, die aus organischem Reibungsmaterial, vollkommen ohne Asbest hergestellt sind. Diese Produktpalette stellt die **Vortrefflichkeit für die Auswechselung der ersten Ausstattung dar**. Das Gemisch dieser Bremsbeläge gewährleistet eine gute Dauerhaftigkeit, ohne die Bremsleistung dabei zu benachteiligen. Neben der hervorragenden Leistung mit den BRAKE PADS SPORT, hat man auch eine hohe Bremsmodulation, die es erlaubt, das Fahrzeug mit großer Sicherheit und Kontrolle bei allen Bedingungen zu stoppen.

## MHR SYNT

### BRAKE PADS MHR SYNT

Die Bremsbeläge mit gesintertem Reibungsmaterial **haben den absolut höchsten Reibungskoeffizienten** und gewährleisten daher reduziertere Bremswege mit rasanten Abdrosselungen. Ihre Eigenartigkeit ist die Fähigkeit, unabhängig von der Temperatur und den Wetterverhältnissen eine beständige Leistungsfähigkeit zu bewahren. Das Reibungsmaterial erhält man durch die Sinterung von Metallstäuben und anderen Kupferelementen, indem man eine Mischung bekommt, die die Bremsleistung erhöht, ohne die Dauer zu benachteiligen.

## MHR

### BRAKE PADS MHR

Das Reibungsmaterial der Bremsbeläge BRAKE PADS MHR ist aus vollkommen organischen Fasern und vollständig ohne Asbest hergestellt. **Die Mischung wurde eigens für agonistischen Gebrauch gedacht** und reduziert den Fading-Effekt auf das mindeste. Die BRAKE PADS MHR erreichen ihren Höchstleistungspunkt in geringster Zeit, behalten gleichzeitig aber eine perfekte Leistungsfähigkeit und eine musterhafte Bremsmodulation von der ersten bis zur letzten Runde eines Rennens bei, was eine wesentliche Bedingung für den Pistengebrauch ist. Die Mischung dieser Bremsbeläge enthält Elemente, die vermeiden, dass das bei hoher Belastung Reibungsmaterial verheizt, wie zum Beispiel die Belastungen bei einem Rennen.

### ZULASSUNG

Malossi bemüht sich jeden Tag darum, die Qualität, Leistungsfähigkeit und Sicherheit ihrer Produkte zu verbessern; das Angebot der Produkterie von **ZUGELASSENEN** Bremsbestände gliedert sich in diese Denkweise ein. Es ist uns sehr wichtig, dass unsere Kunden sicher sind, dass die **MALOSSI PADS** und **MALOSSI SYNT PADS** mit den strengen Standards übereinstimmen, die von der **ECE R90** Zulassungsprüfung auferlegt werden und auf Straßenfahrzeugen in ganz Europa und auch vielen Ländern der Welt benutzt werden können.

Componente  
Testado  
DEKRA

R90

### WIE WERDEN DIE MALOSSI BREMSBESTÄNDE ZUGELASSEN?

Um diese Bescheinigung zu bekommen, müssen die MALOSSI PADS einige Tests auf der Straße überstehen, die mit dem Fahrzeug durchgeführt werden sollen, auf dem sie Bremsbeläge eingeführt werden. Bei diesen Tests überprüft man die Leistungsfähigkeit durch einige Bremsvorgänge, sowohl „kalt“ als auch unter Stress, um die Belastbarkeit der Bremsbeläge, sowie ihre Bremsfähigkeit bei verschiedenen Geschwindigkeiten zu bewerten. Empfindlichkeitstests sind ebenfalls vorgesehen, um auszuwerten, welche Druckänderung man durchführen soll, um bei drei verschiedenen Geschwindigkeiten denselben Bremswert zu bekommen. Neben den Tests auf der Strasse, wird das Material, mit dem die Bremsbeläge hergestellt sind, auch Labortests ausgesetzt, wie Druckwiderstand und Einschnitte. Malossi hat die Zertifizierung **E/ECE/324-E/ECE/TRANS/505 Regulation No. 90** bekommen, wobei sie sich der Zusammenarbeit von Dekra, ein authentischer Riese im Bereich der Zertifizierungen, bedient hat. Die Tests an den Fahrzeugen wurden von Dekra-Inspektoren in den Probepisten von Balocco (Balocco Proving Ground), sowie im Probezentrum Dekra von Cinisello Balsamo durchgeführt und **bestanden die ECE R90 Norm bestens!**

DIE GESAMTE PRODUKTEPALETTE DER MALOSSI BREMSBELÄGE WIRD IN ITALIEN ENTWORFEN UND HERGESTELLT

# BRAKE PADS HOMOLOGADO

Malossi está orgullosa de proponer a su clientela una gama de pastillas de freno completa y adaptada a todos los usos, desde el uso en carretera al de carreras. Nuestros productos son fruto de una atenta fase de investigación y desarrollo que culmina con la superación de los estándares requeridos para las homologaciones de un ente prestigioso como DEKRA.

## SPORT

### BRAKE PADS SPORT

Los Malossi Brake Pads SPORT son pastillas de freno realizadas con material de fricción con base orgánica, y no contienen amianto. Esta línea de productos representa la **excelencia para la sustitución de las pastillas de primer equipamiento**. La mezcla de estas pastillas garantiza una buena duración, sin afectar a la eficacia del frenado. Con BRAKE PADS SPORT a las excelentes prestaciones se adhiere una modulabilidad elevada del frenado, que permite parar el vehículo con gran seguridad y control en cualquier condición.

## MHR SYNT

### BRAKE PADS MHR SYNT

Las pastillas con material de fricción sinterizado **tienen el coeficiente de fricción más elevado** y por esta razón garantizan espacio de parada más reducidos con deceleraciones imponentes. Su peculiaridad es la capacidad de mantener una constancia en el rendimiento con independencia de la temperatura y de las condiciones meteorológicas. El material de fricción se obtiene a través de la sinterización de polvos metálicos y otros elementos con cobre, de lo cual resulta un compuesto que maximiza la potencia de frenado sin afectar a la duración.

## MHR

### BRAKE PADS MHR

El material de fricción de las pastillas BRAKE PADS MHR está realizado con fibras con base completamente orgánica y no contiene amianto. **La mezcla se ha estudiado a propósito para el uso profesional** y reduce al mínimo el efecto fading. Los BRAKE PADS MHR alcanzan el punto de rendimiento máximo en el menor tiempo posible, manteniendo al mismo tiempo una constancia de rendimiento perfecta y una modulabilidad de frenado ejemplar desde la primera hasta la última vuelta de una carrera, condición esencial para el uso en pista. La mezcla de estas pastillas contiene elementos que impiden que el material de fricción se queme cuando se somete a tensiones fuertes, ¡como por ejemplo las que se crean durante una competición!

### HOMOLOGACIÓN

Componente  
Testado  
DEKRA

R90

### ¿CÓMO SE HOMOLOGAN LAS PASTILLAS MALOSSI?

Para conseguir esta certificación los MALOSSI PADS deben superar algunas pruebas en carretera realizadas en el vehículo al que se destinan las pastillas. Durante estas pruebas se verifica la eficiencia mediante una serie de frenados tanto “en frío” como en tensión, para evaluar la resistencia de la pastilla y su capacidad de frenado a velocidades diferentes. También se prevén pruebas de sensibilidad para evaluar qué variación de presión hay que ejercer para obtener el mismo valor de deceleración a tres velocidades diferentes. Además de las pruebas en carretera, el material con el que se realizan las pastillas también se somete a pruebas de laboratorio como la resistencia a la compresión y al corte. Malossi ha obtenido la certificación **E/ECE/324-E/ECE/TRANS/505 Regulation No. 90** valiéndose de la colaboración de Dekra, un auténtico coloso en el sector de las certificaciones. Las pruebas en vehículos han sido realizadas por los inspectores Dekra en el complejo de las pistas de prueba de Balocco (Balocco Proving Ground) y en el Centro de Pruebas de Dekra de Cinisello Balsamo, y han superado con creces todo aquello previsto por la normativa ECE R90!

**MALOSSI**

## BRAKE POWER DISC

Concepiti per ottenere la massima prestazione possibile, Malossi Brake Power Disc rappresenta lo stato dell'arte nell'ambito racing. Niente promesse, solo sostanza.

Tagliati al laser per rispettare le strettissime tolleranze di parallelismo e rugosità imposte dagli elevati standard Malossi per le superfici di attrito, i Brake Power Disc Malossi sono anche super-forati, per favorire il raffreddamento e assicurare una perfetta costanza di rendimento, soprattutto in condizioni di utilizzo estreme.

### Caratteristiche tecniche

Realizzati in acciaio Inox speciale, espressamente formulato e studiato per realizzare i Brake Power Disc, al fine di garantire:

- altissima resistenza per ottenere dischi di piccolo spessore e quindi più leggeri
- assoluta resistenza alla corrosione, agli agenti atmosferici e all'usura
- elevato coefficiente di attrito per una straordinaria efficienza di frenatura ed una notevole progressività in frenata

## WHOOP DISC

Leggerissimi, inossidabili e indeformabili, i Whoop Disc Malossi sono studiati per un uso prolungato in qualsiasi condizione atmosferica e su qualsiasi tipo di percorso, grazie al loro disegno speciale che scarica acqua e fango con grande efficienza e garantisce una perfetta rasatura delle pastiglie.

Abbinati alla gamma Brake Pads Malossi, i Whoop Disc sono in grado di garantire una frenata progressiva e sicura in tutte le circostanze.

### Caratteristiche tecniche

- Realizzati in acciaio Inox, lavorati al laser, bonificati e rettificati.
- Profilo definito al CAD e calcolato per rasare completamente la superficie del materiale di attrito, scaricare le polveri, evacuare l'acqua ed il fango durante la frenata.
- Superficie di dissipazione del calore raddoppiata in grado di mantenere bassa la temperatura d'esercizio.

**MALOSSI**

## BRAKE POWER DISC

Konzipiert, um die bestmögliche Leistung zu erhalten, bietet die Malossi Brake Power Disc den besten Stand der Technik im Bereich Rennsport. Keine Versprechen, nur Wesentliches.

Lasergeschnitten, um strengste Toleranzen von Parallelität und Rauheit einzuhalten, die von den erhöhten Standards von Malossi an Reibungsflächen gefordert werden, sind die Brake Power Discs von Malossi außerdem besonders groß gebohrt, um die Kühlung zu begünstigen und perfekte konstante Leistung, vor allem unter Extrembedingungen, zu gewährleisten.

### Technische Beschreibung

Spezial Edelstahl, eigens konzipiert und entwickelt für die Anfertigung der Brake Power Discs, gewährleistet:

- hohe Widerstandsfähigkeit, um die Bremsscheiben dünn und leicht auszuführen
- absolute Widerstandsfähigkeit gegen Korrosion, atmosphärisch wirkende Kräfte und Verschleiss
- hoher Reibwertkoeffizient, um aussergewöhnliche Bremswirkung weiche Bremsprogression zu gewährleisten

## WHOOP DISC

Federleicht, rostbeständig und nicht verformbar, die Whoop Disc von Malossi wurde für einen verlängerten Gebrauch unter jeglichen atmosphärischen Bedingungen und auf jeder Art von Strecke entwickelt, dank ihrer speziellen Bauweise, die Wasser und Schlamm mit höchster Effizienz ableitet und eine perfekte Abnutzung der Bremsbeläge garantiert.

Abgestimmt auf die Produktpalette Brake Pads von Malossi sind die Whoop Discs in der Lage, progressives und sicheres Bremsen unter jeglichen Bedingungen zu gewährleisten.

### Technische Beschreibung

- Edelstahlscheibe, laserbearbeitet, gehärtet und oberflächenbearbeitet.
- Profildesign durch CAD um vollflächigen Abtrag des Bremsbelags sicherzustellen ebenso wie die Absonderung von Bremsstaub, Wasser und Schmutz während des Bremsvorgangs.
- Oberfläche verdoppelt zur Reduzierung der Betriebstemperatur der Scheibe.

## DISCOS DE FRENO

## BRAKE POWER DISC

Concebidos para obtener la máxima prestación posible, Malossi Brake Power Disc representa la vanguardia del arte en el ámbito racing. Ninguna promesa, solo sustancia.

Cortados con láser para respetar las estrechísimas tolerancias de paralelismo y rugosidad impuestas por los elevados estándares Malossi, los Brake Power Disc Malossi están también superagujereados, para favorecer el enfriamiento y asegurar una perfecta constancia de rendimiento, sobre todo en condiciones extremas de uso.

### Características técnicas

Realizados en acero inoxidable especial, expresamente formulado y estudiado para realizar los discos Brake Power Disc, con el fin de garantizar:

- una altísima resistencia que permite obtener discos pequeño espesor y por lo tanto más ligeros
- también una absoluta resistencia a la corrosión, a los agentes atmosféricos o por uso
- así como un alto coeficiente de fricción que asegura una extraordinaria eficiencia de frenado y una notable progresividad en el mismo

## WHOOP DISC

Ligerísimos, inoxidables e indeformables, los Whoop Disc Malossi están estudiados para un uso prolongado en cualquier condición atmosférica y en cualquier tipo de recorrido, gracias a su diseño especial que descarga agua y barro con gran eficiencia y garantiza una perfecta rasadura de las pastillas.

Combinados con la gama Brake Pads Malossi, los Whoop Disc le garantizan un frenado progresivo y seguro en cualquier circunstancia.

### Características técnicas

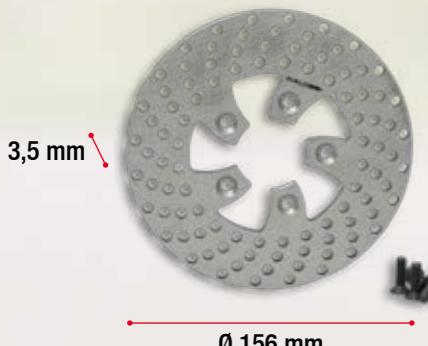

- Realizados en acero inoxidable, trabajado con láser, bonificados y rectificados.
- Diseñado en el CAD y calculado para rasurar completamente la superficie de rozamiento, eliminar el polvo, evacuar el agua y el barro durante la frenada.
- Superficie de disipación del calor redoblada, a fin de mantener baja la temperatura del ejercicio de frenado.

6213085

## KIT WHOOP DISC

**KIT WHOOP DISC**  
DISCO FRENO Ø 250 MAGGIORATO PER FORCELLA ORIGINALE CON STAFFA SUPPORTO PINZA

Questo kit si compone di una staffa di supporto pinza e di un disco freno con Ø maggiorato della linea Whoop disc, l'ideale per chi vuole mantenere la forcella di serie.  
Grazie alla staffa inserita nel kit è possibile infatti montare il Whoop Disc Ø 250 maggiorato anche su forcelle originali, per una frenata poderosa!

## KIT WHOOP DISC

KIT WHOOP DISC OVERRIZED Ø 250 MM BRAKE DISC FOR ORIGINAL FORK WITH CALIPER SUPPORT CLAMP

This kit is composed by a caliper support clamp and an oversized Ø disc of the Whoop Disc line, excellent to mantain the original fork.  
Thanks to the clamp inserted into the kit it is possible to assemble the oversized 250 mm Ø Whoop Disc also on original fork, to obtain powerful braking!

## KIT WHOOP DISC

KIT WHOOP DISC DISQUE FREIN Ø 250 MAJORÉ POUR FOURCHE D'ORIGINE AVEC SUPPORT PINCE

Ce kit est composé par un support pince et un disque frein avec Ø majoré de la gamme Whoop Disc, solution idéale pour ceux qui désirent garder la fourche d'origine.  
Grâce au support inseré dans le kit il est possible d'utiliser le Whoop Disc Ø 250 majoré même sur les fourches d'origines, pour obtenir une freinage plus puissant!

## WHOOP BREMSSCHEIBENSATZ

Bremsscheibensatz, Ø 250 mm mit Übergrösse für ORIGINALGABEL mit HALTESCHELLE FÜR DEN BREMSSATTEL

Dieser Bremsscheibensatz besteht aus einer Halteschelle für den Bremssattel und einer Bremsscheibe aus der Whoop-Disc-Serie mit übergroßem Durchmesser.  
Der Bremsscheibensatz ist hervorragend zur Unterstützung der Originalgabel geeignet. Durch die integrierte Halteschelle kann die Whoop Bremsscheibe mit dem übergroßen Durchmesser von 250 mm auch in eine Originalgabel eingebaut werden.  
Das Resultat ist eine hervorragende Bremswirkung!

## KIT WHOOP DISC

DISCO DE FRENO Ø 250 SOBREDIMENSIONADO PARA HORQUILLA ORIGINAL CON ABRAZADERA SOPORTE PINZA

Este kit se compone de una abrazadera de soporte e pinza y un disco de freno con diámetro aumentado de la línea Whoop disc, lo ideal para quien quiere mantener la horquilla de serie. Gracias a la abrazadera incluida en el kit, es posible de hecho montar el disco Whoop disc de diámetro aumentado (250mm) tambien en la horquilla original para obtener así una poderosa frenada !

## CEPPI FRENO

I ceppi freno della Malossi sono stati studiati per l'installazione su tutti i più importanti veicoli di produzione europea e giapponese. Questi ceppi freno sono stati progettati e testati dai nostri tecnici per superare agevolmente gli stress imposti da un utilizzo esasperato e principalmente per mezzi da competizione che necessitano notevole decelerazioni e costanza di rendimento alle temperature più elevate. Per questo i ceppi freno Malossi sono realizzati in lega speciale di alluminio al Magnesio con materiale d'attrito speciale esente da amianto in base alle nuove norme CEE.

Le nuove mescole del materiale d'attrito sono ecologiche ed offrono caratteristiche enormemente superiori alla media, garantendo una frenata modulare e progressiva, inferiori spazi di frenata e consumi chilometrici di materiale d'attrito estremamente limitati. I tagli obliqui per lo scarico delle polveri sono stati studiati e collaudati in quattro anni di competizioni degli scooter, concluse sempre con le vittorie dei team Malossi.

## BRAKE SHOES

Malossi brake shoes have been perfected for the installation in the most important vehicles produced in Europe and Japan. Our engineers designed and tested them to easily withstand the stresses due to extreme use and above all they designed them for racing machines which need higher decelerations and performance consistency at elevated operating temperatures. For this reason Malossi BRAKE POWER are made of a special aluminium-magnesium alloy and a special asbestos-free friction material, in compliance with new EEC regulations.

The new friction material mixtures are ecological and have considerably better characteristics than the average guaranteeing modulated and progressive braking, shorter stopping distances, and a very low kilometric consumption of the friction material. The oblique edges for exhausting dust have been studied and tested for over four years in scooter racing, always won by Team Malossi.

## MACHOIRES DE FREIN

Les nouvelles mâchoires de frein Malossi ont été conçues pour le montage sur les véhicules les plus importants fabriqués en Europe et au Japon.

Nos techniciens ont étudié et testé ces mâchoires pour qu'elles répondent sans difficultés aux charges imposées par une utilisation poussée à l'extrême, notamment pour les véhicules de compétition, pour lesquels il faut pouvoir assurer des décélérations importantes et un rendement constant aux températures les plus élevées.

Voilà pourquoi les mâchoires BRAKE POWER Malossi ont été réalisées en alliage spéciale d'aluminium au Magnésium, un matériel de frottement spécial sans amiante, conforme aux nouvelles normes CEE.

Les nouveaux mélanges du matériel de frottements respectent l'environnement et leurs caractéristiques sont incomparablement supérieures à la moyenne; ils assurent un freinage modulaire et progressif, un espace de freinage inférieur et une consommation très limitée du matériel de frottement par kilomètre. Les coupes obliques pour l'évacuation de la poussière ont été étudiées et testées sur quatre ans lors des compétitions de scooters, qui se sont toujours terminées avec le succès des équipes Malossi.

## BREMSBACKEN

Die neuen Malossi Bremsbacken wurden passend für die meisten gängigen Fahrzeuge aus Europa und Japan entwickelt. Unsere Techniker entwickelten und testeten diese, um leicht die Anforderungen von Extremsituationen zu meistern, weiters wurden sie für den Renneinsatz entwickelt, bei welchem man bessere Verzögerung und Leistungskonstanz bei höchsten Temperaturen ebenfalls benötigt. Deswegen sind Malossi Bremsbacken aus einer speziellen Aluminium-Magnesiumlegierung in Verbindung mit einem asbestfreien reibwertoptimierten Material unter Rücksichtnahme auf bestehende EEC-Gesetze gefertigt.

Der neue Reibbelag ist umweltfreundlich und hat bessere Eigenschaften als frühere Materialien. Diese Zusammensetzung ermöglicht ein progressives Bremsen bei sehr langer Lebensdauer. Die Nuten, welche den Staub aufnehmen wurden in vierjähriger Entwicklungszeit des Rennteams designet.

## MORZADAS DE FRENO

Las novísimas mordazas de freno Brake Power han sido estudiadas para su instalación en todos y más importantes vehículo de producción europea y japonesa.

Estas mordazas han sido ideadas y probadas por nuestros técnicos para superar fácilmente el "stress" producido por un uso excesivo y principalmente en la competición que necesita constantes deceleraciones y rendimiento constante en las temperaturas más elevadas.

Por eso las mordazas Malossi están fabricadas en aleación de aluminio al magnesio con materiales de rozamiento especial, exentas de amianto conforme a las nuevas normas de la CEE.

La nueva mezcla de rozamiento es ecológica y ofrece características enormemente superiores a la media, garantizando una frenada modular y progresiva, menos distancia de frenado y consumo kilométrico de material de rozamiento extremadamente limitado. El corte oblicuo para la salida del polvo ha sido estudiado y probado en las competiciones de scooters durante cuatro años, competiciones que han acabado siempre con la victoria del equipo Malossi.
